Projects

Website for a marketing company called Growth Agency • ↗

I started my first website using Canva while I was working on different programming languages. I prepared it for them and published it under their domain, but this is the version I have.

KhadamatyAl Shamela Website • ↗

A website containing the services offered, the sections, and an explanation of each. I used HTML, CSS, and JavaScript, as well as some supporting libraries to make the site more professional. My main achievement is delivering my services to everyone.

Swift Pay Website • ↗

I created the website to showcase the financial services we offer, including sending and receiving money. I currently work in this field as well. I also utilize my communication and account management skills for clients. I developed the website in multiple languages to ensure it is accessible and responsive to everyone. My

accomplishments from this website include the ease of accessing information about sending and receiving money.

Graduation Project (1) at my university/Gaza Exchange • ↗

The project, which includes the theoretical aspect, explanations, techniques we will use, and information and data collection for it, has been completed and will be completed next semester. Work is currently underway on it.

Languages

Arabic - Native

English - Proficient

Certificates

Master HTML from Academy Shiyar

June 2024 • ↗

I completed Master HTML professionally
